### **NUMBER 1**

#### **SPECIAL ISSUE: CELLULAR MANUFACTURING SYSTEMS: DESIGN, ANALYSIS AND IMPLEMENTATION**

<b>Mohamed I. Dessouky, Yasser A. Hosni and M. Sadek Eid</b>	iii Editors' letter
<b>Ali K. Kamrani, Hamid R. Parsaei, Herman R. Leep and Peter Sferro</b>	1 Editorial
<b>Hassan M. Selim, Ronald G. Askin and Asoo J. Vakharia</b>	3 Cell formation in group technology: review, evaluation and directions for future research
<b>Geonwook Jeon, Herman R. Leep and Hamid R. Parsaei</b>	21 A cellular manufacturing system based on new similarity coefficient which considers alternative routes during machine failure
<b>David W. He and Andrew Kusiak</b>	37 Designing an assembly line for modular products
<b>Runwei Cheng and Mitsuo Gen</b>	53 Loop layout design problem in flexible manufacturing systems using genetic algorithms
<b>Richard E. Billo</b>	63 A design methodology for configuration of manufacturing cells
<b>Atul Agarwal and Joseph Sarkis</b>	77 A review and analysis of comparative performance studies on functional and cellular manufacturing layouts
<b>Phillip A. Farrington and John W. Nazemetz</b>	91 Evaluation of the performance domain of cellular and functional layouts
<b>Sung-Ho Choi and Ji-Soo Kim</b>	103 A study on the measurement of comprehensive flexibility in manufacturing systems
<b>Kim LaScola Needy, Richard E. Billo and Rona Colosimo Warner</b>	119 A cost model for the evaluation of alternative cellular manufacturing configurations
<b>Stuart Jay Deutsch, Susan F. Freeman and Mary Helander</b>	135 Manufacturing cell formation using an improved $p$ -median model

## Contents

<b>Ming Zhou and Ronald G. Askin</b>	147	Formation of general GT cells: an operation-based approach
<b>William T. Akright and Dennis E. Kroll</b>	159	Cell formation performance measures—determining when to change an existing layout
<b>Ali K. Kamrani, Kevin Hubbard, Hamid R. Parsaei and Herman R. Leep</b>	173	Simulation-based methodology for machine cell design
<b>David Enke, Kanchitpol Ratanapan and Cihan Dagli</b>	189	Machine-part family formation utilizing an ART1 neural network implemented on a parallel neuro-computer
<b>Brian M. Kleiner, Colin G. Drury and Prasad Palepu</b>	207	A computer-based productivity and quality management system for cellular manufacturing
<b>V. Jorge Leon and Brett A. Peters</b>	219	A comparison of setup strategies for printed circuit board assembly
<b>S. Dowlatshahi and M. Nagaraj</b>	235	Application of group technology for design data management

## I Announcements

## NUMBER 2

<b>Alain Chep, Luigi Tricarico, Pierre Bourdet and Luigi Galantucci</b>	257	Design of object-oriented database for the definition of machining operation sequences of 3D workpieces
<b>Ju-Seog Song and Tae-Eog Lee</b>	281	Petri net modeling and scheduling for cyclic job shops with blocking
<b>T. C. E. Cheng and J. Jiang</b>	297	Job shop scheduling for missed due-date performance
<b>Tai-Yue Wang, Her-Chang Lin and Kuei-Bin Wu</b>	309	An improved simulated annealing for facility layout problems in cellular manufacturing systems
<b>Esmail Mohebbi and Morton J. M. Posner</b>	321	Sole versus dual sourcing in a continuous-review inventory system with lost sales
<b>Haldun Aytuğ and Can A. Doğan</b>	337	A framework and a simulation generator for kanban-controlled manufacturing systems
<b>Yu Cheng</b>	351	Solving push-out conflicts in apron taxiways of airports by a network-based simulation

# Contents

<b>S. T. Enns</b>	371	Work flow analysis using queuing decomposition models
<b>Moshe Eben-Chaime</b>	385	Spreadsheet calculations for the machine interference queueing model
<b>A. Michiotis, D. Xerocostas and N. Galitis</b>	391	A new integrated system for selecting mining equipment
<b>Utpal Roy and V. Ramana Dasari</b>	399	Implementation of a polygonal algorithm for surface-surface intersections
<b>G. Miraç Bayhan and Mahmut Bayhan</b>	413	Forecasting using autocorrelated errors and multicollinear predictor variables
<b>Collin Wang, Li-Shing Ho and David J. Cannon</b>	423	Heuristics for assembly sequencing and relative magazine assignment for robotic assembly
<b>Y. F. Zhang and J. Y. H. Fuh</b>	433	A neural network approach for early cost estimation of packaging products
<b>Hadi Gökçen and Erdal Erel</b>	451	Binary integer formulation for mixed-model assembly line balancing problem
<b>Li-Chih Wang and Shao-Ying Wu</b>	463	Modeling with colored timed object-oriented Petri nets for automated manufacturing systems
<b>J. N. Pan</b>	481	Reliability prediction of imperfect switching systems subject to Weibull failures
<b>R. Nagarajan, R. N. Kumar, R. A. Halim and Arman Rosli</b>	493	A predictive fuzzy logic controller for resin manufacturing
<b>T. N. Wong and C. B. Leung</b>	501	Conversion of box-shaped features for manufacturing applications
<b>John G. Cherg, Xin-Yu Shao, Yubao Chen and Peter R. Sferro</b>	515	Feature-based part modeling and process planning for rapid response manufacturing
<b>Srinivasaraghavan Parthasarathy and Chandrasekharan Rajendran</b>	531	Scheduling to minimize mean tardiness and weighted mean tardiness in flowshop and flowline-based manufacturing cell
<b>Haitham M. Al-Deek, Sherif S. Ishak and A. Essam Radwan</b>	547	Impact of traffic diversion with ATIS on travelers' safety

*Note*

**Jay Liebowitz,**  
**Phillip Kevin Giles,**  
**Tom Galvin**  
and **George Hluck**

- 559 The role of knowledge-based systems in serving as the integrative mechanism across disciplines

**NUMBER 3**

**Shing I. Chang** and  
**Thomas R. Samuel**

- 565 A control point methodology for CUSUM control charts

**S. Cem Karacal**

- 573 A novel approach to simulation modeling

**Richard A. Followill** and  
**Dinesh S. Dave**

- 589 Financial cost inclusive reformulations of inventory lot size models

**K. H. Lee, J. K. Lee** and  
**N. S. Park**

- 599 Intelligent approach to a CAD system for the layout design of a ship engine room

**Bhaba R. Sarker** and  
**Haixu Pan**

- 609 Designing a mixed-model assembly line to minimize the costs of idle and utility times

**Jeong-Wook Kim** and  
**Young-Gul Kim**

- 629 Effect of information resource control on IS effectiveness: empirical validation

**I. T. Dedopoulos** and  
**Y. Smeers**

- 643 An age reduction approach for finite horizon optimization of preventive maintenance for single units subject to random failures

**Manuel D. Rossetti** and  
**Gordon Clark**

- 655 Evaluating a queueing approximation for the machine interference problem with two types of stoppages via simulation optimization

**Gur Mosheiov**

- 669 Vehicle routing with pick-up and delivery: tour-partitioning heuristics

**Wenhong Luo**

- 685 An integrated inventory system for perishable goods with backordering

*Note*

**Abraham Grosfeld-Nir**  
and **Boaz Ronen**

- 695 The complete kit: modeling the managerial approach

**NUMBER 4**

**Mohamed A. Ahmed,**  
**Talal M. Alkhamis** and  
**Douglas R. Miller**

- 703 Discrete search methods for optimizing stochastic systems

# Contents

<b>Ina S. Markham, Richard G. Mathieu and Barry A. Wray</b>	717	A rule induction approach for determining the number of kanbans in a just-in-time production system
<b>John P. T. Mo and Bryan C. K. Tang</b>	729	Petri net modelling and design of task oriented messaging system for robot control
<b>Murali Krishnamurthi and Sanjeev Thallikar</b>	743	A deadlock detection interface to a commercial simulation language
<b>S. M. Taboun, N. S. Merchawi and T. Ulger</b>	759	A two-stage model for cost effective part family and machine cell formation
<b>Johnny K. C. Ng and W. H. Ip</b>	777	The strategic design and development of ERP and RTMS
<b>Maged M. Dessouky</b>	793	Scheduling identical jobs with unequal ready times on uniform parallel machines to minimize the maximum lateness
<b>Chris W. Barfoot and M. Yousef Ibrahim</b>	807	Development of an adaptive fuzzy behavioural control system with experimental and industrial applications
<b>S. Zolfaghari and M. Liang</b>	813	Machine cell/part family formation considering processing times and machine capacities: a simulated annealing approach
<b>Dingwei Wang and Wei Wang</b>	825	Earliness/tardiness production planning approaches with due-window for manufacturing systems
<b>Ayse Kavusturucu and Surendra M. Gupta</b>	837	A methodology for analyzing finite buffer tandem manufacturing systems with <i>N</i> -policy
